Dear Parent/Carer

Personalised Mathematics Intervention

I am writing to inform you that we have chosen your child to benefit from some additional mathematical intervention to support them in reaching their full potential in class.

As a school we have invested in a online maths intervention programme Third Space Learning (<https://thirdspacelearning.com/>) which allows pupils to access personalised online maths lessons from specialist one to one tutors. This program is designed to build confidence and resilience in mathematics whilst identifying areas where additional learning and support is required

The intervention will last one hour and will be delivered online with a personal qualified tutor. This specific program is designed to last 12 weeks. It will take in schooltime.

We believe this program will develop your child's independent learner needs and improve their access, participation and achievement in the classroom.

We do hope that you see this as a super opportunity to allow your child to access mathematics completely personal - tailored to their needs. and therefore, I hope this does not concern you in any way. I would be happy to answer any questions you may have via head@st-andrews.lincs.sch.uk

Kind regards

Morag Coote
